Projects

Presidential Elections Platform

Angular, NodeJS

- Developed a secure, real-time online voting platform that enables user registration, candidate profiles, and live results tracking for election events.

UniTrucker

Angular, Spring Boot

- Designed a task management web application for university use, allowing professors to assign tasks, students to track progress, and administrators to manage the system and access performance insights.

Prépa du Prépa

Django / Symfony

- Created a resource hub (Twice) for engineering entrance exam preparation, with organized study guides, practice exams, and current news for quick, intuitive access.

3DEEZ

Angular, JSON

- Built an online store for custom 3D-printed products with a streamlined checkout and dynamic item previews, enhancing user experience and accessibility.

Algohub

HTML, CSS, JavaScript

- Developed a C programming learning platform tailored to college requirements, featuring courses, exams, and interactive content.

Portfolio

HTML, CSS, JavaScript

- Created a personal portfolio to showcase my projects, skills, and accomplishments in an interactive, user-friendly format.

Techcamp

HTML, CSS, JavaScript

- Built an educational platform providing an overview of key IT fields (e.g., Frontend, Backend, DevOps) with recommended skills and tools for each.

Core Skills

Teamwork & conflict, Adaptability & Flexibility, Time Management, Technical Support, Problem Solving;

Java, JavaScript, HTML, CSS, TypeScript, PHP, Python, Twig;

Mobile Development: Flutter, Android (Java);

Web development: AngularJS, Spring Boot, Django, Symfony, Bootstrap.

Database Management : MySQL, Oracle, PostgreSQL ;

Git, Linux, Figma, UI/UX principales, XAMPP, VMware, Postman, Microsoft Excel ;

UML, Scrum, XML, Data Structures & Algorithms, Binary Arithmetic.

Work Experience
